| Pack F100-2 SW | 5 200 kg |
| Pack F100 SW.T | 2 600 kg |
| Pack F100-2 SW.T | 5 200 kg |

Air 25°C - Water +15°C

Plug-in units

The ICE-PACKS are packaged units, ready to produce ice after connection to water and power supplies. They are designed for an easy on-site installation by refrigeration contractors.

Pack 14

Improved production

The ICE-PACKS provide increased production capacities thanks to the optimum combination of the ice generator with a suitable condensing unit.

Greater flexibility

The ICE-PACKS can be used in ambient temperatures ranging from +5 to +35°C. Optional fittings allow them to adapt to the most demanding site conditions. They comply with regulations for the use of refrigerants and are available with R404A and R449A.

Pack 33

Guarantee of safety

An ICE-PACK is a label of trust providing the safety of correct operating and full support from an international network of contractors. Each PACK is tested in our factory prior to departure and benefits from over 50 years of experience.
